

- B1
18. (Amended) A method of treating sepsis in a subject comprising:
administering, in a pharmaceutically acceptable manner, a pharmaceutically effective amount of two or more immunoregulators, immunoregulators peptides, functional fragments or functional analogues thereof to the subject, wherein said immunoregulators comprise peptide and recombinant hCG.

Please add the following new claims:

21. (New) A method of treating sepsis in a subject comprising:
administering, in a pharmaceutically acceptable manner, a pharmaceutically effective amount of two or more immunoregulators to said subject, wherein at least one of said immunoregulators is a peptide.
22. (New) The method according to claim 21 wherein the peptide is selected from the group consisting of SEQ ID NO: 1, SEQ ID NO: 2, SEQ ID NO: 3 and a functional fragment of any thereof.
- B2
23. (New) The method according to claim 22 wherein both immunoregulators are selected from the group of immunoregulators consisting of SEQ ID NO: 1, SEQ ID NO: 2, and SEQ ID NO: 3 and a functional fragment of any thereof.
24. (New) The method according to claim 21 wherein one of said immunoregulators is human chorionic gonadotropin.
25. (New) The method according to claim 22 wherein the peptide is that of SEQ ID NO: 1.
26. (New) The method according to claim 22 wherein the peptide is that of SEQ ID NO: 2.
27. (New) The method according to claim 22 wherein the peptide is that of SEQ ID NO: 3.
